

Miba – Facts & Figures

Miba is an international group that produces technologically advanced and highly resilient power train components. Our bearings, sintered components, friction materials, power electronics components and coatings make vehicles, trains, ships, airplanes and power stations more powerful, efficient and environmentally friendly. Miba technology enables resource-efficient mobility.

Miba Headquarters:	Laakirchen, Austria (in the state of Upper Austria)
Sites in Austria:	Laakirchen, Vorchdorf, Roitham, Niklasdorf, Kirchbach, Ligist
Production Facilities Worldwide:	Austria, Slovakia, Slovenia, United Kingdom, United States, China, Brazil and India
Sales Offices Worldwide:	Singapore, France, Germany, Italy, USA and China
Divisions:	<p>Miba Sinter Group: components for passenger car engines, transmissions and shock absorbers</p> <p>Miba Bearing Group: half shells, bushings and thrust washers</p> <p>Miba Friction Group: friction linings for brakes and clutches</p> <p>New Technologies Group: power electronic components, special machinery</p> <p>Miba Coating Group: highly specialized surface coatings</p>
Customers:	The international engine and automotive industry
Employees:	Approximately 3,600 (about 50% of whom work at the Austrian locations)

Key Company Figures:

	2010/11	2009/10
Sales (in million €)	437.2	311.8
Miba Bearing Group	159.7	125.3
Miba Sinter Group	173.4	125.2
Miba Friction Group	74.9	50.5
New Technologies Group	20.6	6.9
Miba Coating Group	8.6	3.9
Earnings before interest and taxes (in million €)	54.5	16.4
Investments (in million €)	34.3	19.3
Cash flow (in million €)	65.8	48.1
Equity ratio (in %)	54.9	60.1
