

Conflict Minerals („3TGs“)

Miba Friction Group is committed to sourcing materials from companies that share our values in human rights, ethics and environmental responsibility.

In 2012 the SEC (Security and Exchange Commission) adopted a new rule pursuant to the Dodd-Frank Act requiring public companies to make disclosures of „conflict minerals“ in their products.

The rule is designed to reduce the funding of armed groups engaged in conflict in the DRC (Democratic Republic of Congo) and surrounding countries by mandating additional disclosure requirements on the use and source of certain minerals whose exploitation and trade congress believed are contributing to significant human rights abuses in the DRC.

The specific minerals considered in the legislation are identified as Tungsten, Tantalum, Tin and Gold („3 TGs“). Miba Friction Group complies with the rule pursuant to the Dodd-Frank Act.
