

## Data sheet

# Plate edge milling machine

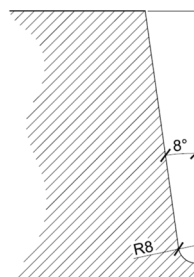

for preparing weld seam profiles on flat steel sheets

### Description

The plate edge milling machine is able to prepare any weld seam profile. The milling cutter automatically follows the plate contour and guarantees a uniform profile for a subsequent automated, economical welding procedure.

### Example of weld seam profile

### Specifications

Power:	100 kW
Plate thickness:	max. 120 mm
Shape/profile:	I, V, X, Y, half tulip
Work piece width:	max. 5,000 mm
.....	
Straight and conical plates	
Hydraulic clamping table	
Chip conveyor	
Siemens Sinumerik 840 D SL control system
