

Data sheet

Long seam milling machine

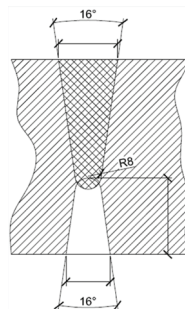

for preparing weld seam profiles on tube sections

Description

The longitudinal weld seam milling machine is able to prepare longitudinal weld seam profiles at the outer diameter of tube sections. The milling cutter profile guarantees a uniform groove for a subsequent automated, economical welding procedure. The positioning and clamping of the work pieces takes place above the machine.

Example of weld seam profile

Specifications

Power:	65 kW
Work piece ø:	max. 8,000 mm
Work piece length:	max. 4,700 mm
Milling depth:	max. 120 mm
Shape/profile:	tulip
.....	
Steel platform for positioning and clamping	
Chip conveyor	
Siemens Sinumerik 840 D SL control system
